

## Addendum #4

Date: Tuesday, June 04, 2019

---

Project: City of Concord, NC  
Highway 29 Elevated Water Storage Tank  
Project No. 2018-017

---

To: All Plan Holders

You are hereby advised of this Addendum #4 as a supplement to the Bid Documents for Highway 29 Elevated Water Storage Tank (Project No. 2018-017). Please incorporate all information in the preparation and pricing of your bid. Please acknowledge receipt of Addendum #4 on your proposal/bid form.

### **Contractor Questions/Comments:**

Comments and questions from potential bidders are presented in *italics*, responses are presented in **bold**. Potential bidder questions and comments presented below have been paraphrased to be as concise as possible.

**Item 1:** *According to our records there have only been four (4) Fluted Column Tanks of equal or greater capacity to the one specified (2 Million Gallons), bid in the last five (5) years. None of those four (4) bids were awarded or constructed. We recommend that the qualification requirements for fluted column tanks be changed to a minimum of ten (10) fluted column tanks with the capacity of 1 million gallons or greater completed in the last ten (10) years.*

- **This is acceptable. The qualification requirement for the fluted column alternative shall be ten (10) fluted column tanks of at least 1 million gallons in size completed and placed in operation in the last ten (10) years.**

**END OF ADDENDUM**
